

I am passionate about research administration, training and the importance of NCURA to promoting education, sense of community and belonging. A lot has changed over the years, however, my unapologetic appreciation for my NCURA membership has not waived. If elected, I will bring my passion for NCURA and the field of research, coupled with my proven leadership background to this role. I look forward to igniting this feeling in others and the opportunity to assist in developing, supporting, and mentoring new and existing research administrators.
